Profile

Engineering student in Network Security & Cybersecurity at **TEK-UP University**, specializing in **Cloud, Platform Engineering and DevOps**. Hands-on experience with **AWS, Linux, CI/CD, containers and infrastructure automation**. AWS Solutions Architect, RHCE and RHCSA certified. Seeking a **6-month final-year internship starting February 2027**.

Skills

Cloud & Infrastructure: AWS, Terraform, Linux, Ansible

Containers & Platform: Kubernetes, Docker, Nginx, ArgoCD

CI/CD & Observability: GitHub Actions, Jenkins, Prometheus, Grafana

Security: DevSecOps, AWS Security Hub, CIS AWS Benchmark, OWASP Top 10, Burp Suite, OWASP ZAP

Development: Python, Node.js, TypeScript, Java, Vue.js, PostgreSQL, MongoDB

Experience

Cybersecurity & DevOps Engineering Intern, Ooredoo Tunisia Jul. – Aug. 2026

- Designed a **Threat Intelligence** platform integrating four vulnerability and threat sources (NVD, CISA KEV, VulnCheck, GHSA), with data normalization, API rate-limit handling, threat prioritization and real-time alerts.
- Developed the solution using **Python/FastAPI, PostgreSQL and React**, and containerized application components with **Docker**.

Cloud & DevOps Intern, Fresenius Kabi Aug. – Sept. 2025

- Implemented a **GitHub Actions + Docker CI/CD** pipeline automating application deployment on a resource-constrained VM.
- Configured **Nginx** as a reverse proxy and hardened **Linux** servers in a production environment.

Full-Stack Developer & DevOps Engineer, EdTrust – Part-time, Remote Jun. 2024 – Feb. 2025

- Automated onboarding for **40+ clients** through HubSpot CRM, triggering automatic account creation and database initialization.
- Developed **10+ features**, fixed bugs and implemented **CI/CD pipelines** across development, staging and production environments.

Final-Year Intern, EdTrust – Remote Feb. – May 2024

- Developed **EdMin (MEVN)** end-to-end, an internal school management platform supporting users, roles, clients, packages and dashboards.

Projects

AWS Cloud Security & Automated Remediation 2026

- Provisioned an AWS infrastructure with **Terraform**, including **VPC, EC2, S3 and IAM**, applying the principle of least privilege.
- Configured **AWS Config, Security Hub and CloudTrail** and automated security and compliance remediation using **Lambda**.

Cloud-Native DevSecOps Platform GitHub 2026

- Designed a **cloud-native application platform** on **Kubernetes**, using **Terraform** for infrastructure and automated CI/CD for deployment.
- Integrated secret detection, SAST, dependency analysis, container image scanning and **SBOM** generation into the delivery pipeline.
- Implemented **Prometheus/Grafana** for observability and enforced **non-root** container execution.

Education

TEK-UP University – Engineering Degree, Network Security & Cybersecurity 2024 – Sept. 2027
Ranked 5th/30

ISI Mahdia – Higher Institute of Computer Science – Bachelor's Degree in Computer Science 2021 – 2024

Certifications

AWS Certified Solutions Architect – Associate (SAA-C03) | **Red Hat Certified Engineer (RHCE)**
Red Hat Certified Developer in Cloud-native Applications | **Red Hat Certified System Administrator (RHCSA)**
